

	<b>Environmental Policy Statement</b>	Issue Date 21/07/2019	Rev 10
FM/HQ/ENV(PY)01	<b>G4S Facilities Management (UK) Limited</b>		

As a leading FM service provider, G4S Facilities Management [G4S FM] recognises that its business activities can lead to both direct and indirect impacts upon the local and global environment. Furthermore, G4S FM acknowledges the value of managing those impacts and alongside our suppliers, we actively seek to work in partnership with our customers and stakeholders to consider the impacts associated with the business and to mitigate against or to effectively manage them accordingly.

These considerations form part of the core values held by G4S FM and the company is committed to comply with all applicable legislation and any (other) requirements, as appropriate to the business for the protection of the environment. G4S FM align their environmental management with the ISO 14001 Environmental Management standard. In addition, G4S FM has a commitment to meeting all our compliance obligations and to the prevention of pollution to land, air or watercourse through any uncontrolled event or discharge. G4S FM aspires to further minimise and mitigate any (negative), environmental impacts by committing to;

- Continual improvement to enhance environmental performance wherever practicable,
- Encouraging environmental awareness amongst those working for, or on behalf of, G4S (FM) through effective training and communication.
- Promote the efficient use of resources through the minimisation of waste, achieved through the effective use of the waste hierarchy, encouraging re-use and recycling.
- Sharing of environmental information with clients and contract stakeholders, to actively achieve environmental best practice where found to be relevant to our certified contract management systems.

In all of our work streams delivering facilities management services we will work to these commitments and annually review our progress against them in order that we enhance our environmental performance. We will review progress against the wider environmental targets set and reported upon by G4S plc and against those specifically for G4S FM as put in place by the G4S FM contract management teams as part of their contract management systems.

This Environmental Policy Statement is publicly available on our external website as well as communicated internally via our intranet and internal briefings to our people and communicated to our contractors as part of contract documentation.

Signed

Philip Dove  
Managing Director  
G4S Facilities Management and Public Services
